

## **Tenuta delle Terre Nere**

The estate has been in the conversion phase to organic viticulture since 2007. It is officially certified organic starting from the 2010 vintage

Up to 2012 in Italy only the agricultural aspect could be certified as organic or biodynamic. According to a regulation of the EU enforced on the 1<sup>st</sup> of August 2012, wines can now be certified as “organic” starting from the 2012 harvest and “vino biologico” (“organic wine”) can be written on the label.
